OC-Sensor FIT-Screening

Early Detection of Bowel Cancer

nordlab & Mast Group

Step by Step Instructions

1

Write your name and date on the sample bottle.

2

Place collection paper or several layers of toilet paper inside toilet bowl on top of water. Deposit stool sample on top of paper.

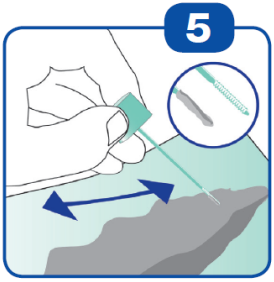
3

Open sample bottle by twisting and lifting the green cap.

4

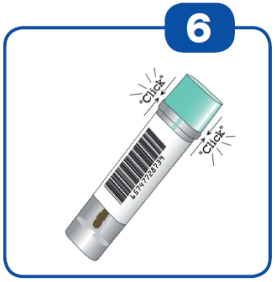
Collect a sample by scraping the green stick over the surface of the bowel movement.

5



The grooved end of the stick has to be covered with fecal sample.

6

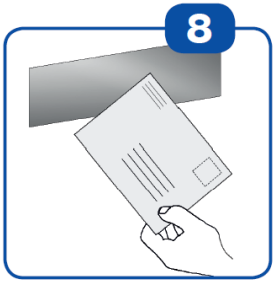


Insert the stick back into the tube and push the green cap close (click the green cap on tightly). Do not repeat, do not reopen.

7

Shake the closed sample bottle vigorously up and down several times and place the sample bottle in the green plastic bag.

8



Return sample bottle as soon as possible to the screening-center/ your doctor – a rapid sample return time provides best security of your sample.
